### Benefited by Tanlac

Thousands of frail, nervous people and convalescents everywhere have testified to the remarkable power of Tanke in bringing back their health. strength and working efficiency. It seems to quickly invigorate the constitution, and is a powerful fee of weakness, Mrs. George G. Owen, of Salem, Oregon, says:

"My nerves were upset and the little I ate wasn't enough to keep up my strength, so I lost weight and became so weak it seemed I had no energy at all. Tanine restored my health completely, and I gained twelve pounds in weight."

There is not a single portion of the body that is not benefited by the helpful action of Tanine. It enables the stomach to turn food into healthy blood, bone and muscle, purifies the system and helps you back to normal weight. Get a bottle today at any good druggist .- Advertisement.

Triumph In Right Beginnings. In contemplation if a man begin with certainties, he shall end in doubts, but if he will be content to begin with doubts, he shall end in certainties.-Bacon.

Balloon Steering Drifting for miles in a free balloon might seem to offer little prospect for a landing again on your own doorstep. But an accommodating air current and a little head work turned this trick for Junius P. Smith, of the army air service, at Langley field, Virginia. His experience is unique in lighter-than-air work. Carried off in one direction by the wind, the aeronaut ascended until calm was caused by two strong air currents moving in opposite directions, he threw out ballast, rose above the calm, caught the current moving swiftly in the direction opposite and returned to his starting point,

### Whole System Is RAILWAY STRIKE TERMS EFFECTFD

UNION MEN YIELD TO SEPARATE PEACE TERMS-NEW WAGE SCALE STANDS

All Shop Workers Are to Return With Rank Held Last June-Joint Commission to Be Formed to Act Upon

Chicago. The railroad strike is ended. Official aunouncement was made by R. M. Jowell, President of the railway employees' department of the American Federation of Labor. The number of roads that have agreed to renew contracts with the shopmen's union was not contained in Mr. Jewell's announcement. It was under stood that from 40 to 60 roads would accept the terms immediately. The strike was called July 1 when shopmen refused to accept a wage decision of the United States Railway Labor Board. Approximately 400,000 men walked out.

A memorandum of agreement, as contained in Mr. Jewell's statement. contains eight clauses.

First, it is agreed that the agreement is made "upon the understand ing, which the parties hereto accept that the terms hereto shall be carried out by officers of the companies and the representatives of the employees | CREW EXAMINES RAIL BRIDGES in a spirit of conciliation.

Second, that all men are to return to work "in positions of the class they held June 30, 1922, and at the same point."

Fourth, if disputes arising cannot be adjusted otherwise they shall be referred to a commission to be established. This commission will have final authority.

Fifth, the commission shall be com posed of six railroad representatives This commission is to be established within 15 days "from the signing of this agreement

Sixth, all parties agree that neither or between railroads signing the same or any other class or classes of their employees in any other controversy that hereafter may arise."

Seventh, both parties pledge them selves that no "intimidation nor oppression shall be practiced or permitted against any of the employees who remained at work or have taken service or as against those who resume work under this understanding." Eighth, all suits at law now pending as a result of the strike to be with-

## ON COAL PROFITEERS

SEEKS LAWS TO CURB EXCESSIVE PRICES OR TO SEIZE PROPERTIES

roposals For Lower Prices To Consumers Again to Be Made to Operators and Dealers-Drastic Steps to Be Itade If Terms Are Spurned.

Columbus, O - With a narrow margin in each branch, the Ohio General Assembly passed as an emergency neasure the bill of Governor Harry L. Davis to establish a fuel adminisration in Ohio. The action followed short but spirited debate. The bill was passed in the House, 86 to 12, and the emergency clause was adopted 85 to 11, one more than the necessary two thirds. The Senate passed the bill, 28 to 3. The emergency clause was adopted, 25 to 6, with Senator James Reynolds, Cleveland, lone Democratic member of the Upper House, easting the deciding vote,

Columbus.-Using the strategy of solation, combined with the massing of overwhelming force, Governor Harry L. Davis, employing the Ohio Assembly, began his final maneuvers against recalcitrant Ohio coal operators to compel the fixing of lower prices for fuel and the surrender of co-operation.

His purpose is to obtain a vote of absolute power to control prices, seize mines and regulate distribution and situation by attempting to burn down then renew proposals rejected by fuel producers. If they once more decline the suggested basic prices the power probably will follow. If his renewed overtures are accepted legislation asked for today will not be utilized.

This plan was revealed by the bill drawn by Attorney-General John G. Price and fathered by the Governor. Returning to the school from lunch In the first paragraph of the measure traordinary powers. Peculiarly enough, this authority is

datory. In other words, the Governor is not required to proceed, after the bill is enacted into law, immediately o name this official

Even Celebrated Engineers Have Book Known to Waste Time on Unnecessary Measuremen

There can be too great accuracy, according to Chemical and Metallurgical Engineering, which says:

"We recall one instance where a :elebrated engineer was preparing a set of tables for publication and was ising a set of 12-place logarithms. We se replied that they were the best he about what he could not say. He were 20-place tables but he had been mable to locate them. The interestng thing about this anecdote is that practically all the data which the celein accuracy which was seldom better than 1 per cent, and an ordinary 12-

"Again, when a young engineer is lation, say for example the surface of heating coils necessary to obtain cer-Flemingsburg-At Ringo's Mill, this sit down and calculate it to an accuracy of a tenth or even a hundredth fact that the constant factor in the equation (the rate of heat transfer)

may not be known within 50 per cent. "Herein lies one excellent reason why many a practical man with good mmon sense and a wide experience has been able to compete with engineers in many fields."

### SPELLS THAT ARE POTENT

Evidently There is Something in the "Medicine" Devised by East African Witch Doctors.

Quite recently a Kikuyu (East African) had a spell put on him by a witch doctor, whereby he was compelled to kill the first man be met. The Kikuyu went to another witch doctor and had the spell removed. But No. 1 was cute, He placed a medicine on the Kikuyu's doorstep so that when the latter

stepped over it the spell would be re placed. The Kikuvu came out of his but shortly afterward, immediately ran amuck, went down the street and killed the first man he met-another old Kikuyu. The witch doctor and the murderer both stood their trial and the witch doctor got the longer sen-

tence. At a place called Kibos there once lived an old gentleman who carried round a monkey's paw strapped to his finger. Whoever he pointed this at immediately fell down stone dead. He caused so many deaths that he ultimately had to be removed from the district by the government.-Lon-

### Apples Breathe,

Every living organism, whether ani-mal or vegetable, breathes; that is, it absorbs oxygen and gives off carbonic

Any organism which does not reathe may be considered dead. Now, ripe apples plucked from apple trees. are not dead. They are not so vigorously alive as while the sap ran through them, but still they are alive, and so they breathe and absorb oxygen. It is found, too, that apples stored in an atmosphere of oxygen and carbonic acid keep twice as well as

apples stored in common air. No doubt the oxygen stimulates their respiration and increases their vitality, while the carbonic acid serves is food, provided sufficient lig reaches the chlorophyl in the skin of the apple.

Watchman Helps Men on Careers. "I've helped make more hig men than most old fellows have, despite my menial job, and of course I haven't done it through giving young upstarts financial backing," boasts the venerable night watchman for a large downtown corporation.

"You see, people who come and go here after seven o'clock are supposed to sign in and out. Well, a lot of young fellows are in a hurry to get out and oftentimes don't want to sign out. I make them, though, and in that way the big bosses, scanning the time sheets and personal reports, learn that young So and So is an industrious lad, who often works overtime. Christmas presents from them net me a big penny annually, attesting appreciation for what I've done." New York Sun.

### Bear Island.

Midway between Norway and Spits bergen, Bear island thrusts its head. known as Mount Misery, above the for moss and lichens is almost destitute of vegetation. Long ago it was joined with the Spitzbergen archipelago; the continental shelf upon valley deepening to 200 fathoms; this marks the course of an ancient river system that must have drained an aren larger than the present basin of
